

GreenMango provides agile testing services to implement rigorous and effective testing with a high level of automation in the sprints. We cover both functional and non-functional acceptance criteria with tests built into a continuous integration environment.

Agile Testing

Benefits of Agile Testing Services

- Ensure testing is embedded in the scrums
- Provide a level of testing independence
- Provide agile testing skills and experience
- Provide a structured approach to testing both during and after the iterations/sprints
- Ensure non-functional requirements are recognised and covered early

How we can help

- Optimise agile test processes
- Provide agile specialist testers in the scrums/teams
- Engage users/business to contribute more to the acceptance process and increase exploratory testing
- Manage automated test packs and measure ROI
 - Increase test coverage
 - Integrate testing into the CI process
 - Deliver manageable automation suite
- Provide managed non-functional testing

Our Agile Testing Services

- Agile testing reviews and strategies
- Agile testing leadership
- Agile test coaching
- Provision of agile testing teams
- Agile testing tools expertise – FitNesse, Cucumber, SpecFlow, JMeter, Grinder
- Build of automated regression test packs
- Structured approach to UAT, OAT and performance testing
