

GreenMango reduces the overall cost and risk associated with change by aligning testing across multiple interdependent applications and overlaying a single End to End (E2E) test approach across the platform(s)

Benefits of E2E Test Management

Risk Reduction

- Validates critical business processes
- Provides better visibility of quality
- Helps minimise delays in meeting milestones

Cost Reduction

- Reduces duplication of tests and testing
- Minimises time wasted due to data conflicts
- Reduces defects in production

How does it work?

- Provides a consolidated view of E2E tests
- Manages E2E test data requirements
- Helps to provide a consistent level of test coverage
- Reports on E2E quality
- Prioritises defects to focus on unblocking issues with E2E functionality

What is the E2E Test Management Service?

- Ownership of the E2E testing
- Stakeholder management across the platform
- Risk analysis across the platform
- Definition of the E2E Test Strategy
- Creation of a combined Test Plan
- Coordination of dispersed test resources with differing priorities
- Stakeholder of the E2E test environment
- Management of test data across all applications
- Coordination of the processing jobs
- Management of flows through external interfaces
- E2E Defect Management

Areas where we have helped

- Utilities
- SAP Systems
- CRM
- Property
- Broadcasting
- Media
- Finance and Accounting
- Banking
- Insurance
